Sleep World...

Sleep, which is a miraculous reality for every living creature is the process of renewal for body and mind. It is a basic need just like breathing, eating and drinking water. Your sleep must be uninterrupted and high-quality to rest really and feel healthy and ready for a new day after sleep. Refreshing night sleep is vital to maintain a balanced and healthy life.

A Good Sleep and More!

All valuable details are absolute must for a good sleep in İDAŞ, such as providing optimum support that body needs, protecting natural "S" line of backbone, giving anatomical support by filling waist and neck cavities. With correct bed, it is also possible to prevent some health problems such as posture disorders, involuntary movements, circulatory disorders, etc. beyond resting well. Person loses fluid during sleep just like he/she loses in a day to protect body temperature and needs air. Thanks to air permeability and moisture control systematics of sleep products, temperature balance is preserved and sleep interruption is prevented. Person becomes peaceful when he/she sleeps in an environment where formation of moisture and bad odors, bacteria and dust mites are not allowed and hygiene is protected. Functional and personalized products which serve needs raise the coefficient of pleasure and create a sense of belonging. Therefore, sleep latency realizes in the optimum time and you have your time.

İDAŞ Sleep...

We design and protect best sleeps for you. Our engineers and experts perform their R&D operations with technologies of sleep industry, so we protect our quality standard with our half-century experience. We present our sleep world to your taste with a value created by master hands.

Waking up fine is not a dream...

**NEW
PRODUCT**

Boutique Collection **LUXORA**

A sleep to make the stars envious...

The specially developed Memory-Latex comfort layer, combined with the latex filling layer derived from natural rubber sap, provides Luxora with high anatomic and orthopedic features, offering full support to your body while the hybrid memory feature counters the pressure applied on the sleep surface. Thanks to its flawless filling that reduces pressure at weight points and conforms to your body shape, it helps prevent muscle pain and stiffness. It also supports blood circulation.

This way, you feel less need to toss and turn during sleep and wake up refreshed. With its five-zone weight-balancing pocket spring system operating independently from each other, it selectively applies different support to your body's weight zones, while the Free Zone system offers uninterrupted sleep comfort by not making you feel your partner's movements.

SMARTTECH

Comfort provided by technology

Thanks to the patented Smart Spring two-phase pocket spring technology, which is designed exclusively for IDAŞ, Smarttech mattress offers a soft welcome and comfort first and then a firmer and more solid sleeping surface for optimum spine support, regardless of body weight. Thanks to its breathable natural structure, the latex comfort texture provides optimum heat and moisture transfer and increases your sleep comfort by spreading your body pressure over the entire surface.

Boutique Collection **LEGENDARY**

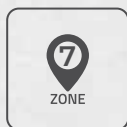

Legendary, pearl of comfort and technology...

Designed with 7-Weight Area Pocket Springs for an irreplaceable sleep, Legendary forms an anatomical surface and prevents the couples from being affected by their movements during sleep. It gives an extra comfort on haunch and shoulder areas where your body needs support. İDAŞ horse hair with Oeko-Teks 100 Certificate helps the bed breathe thanks to large air ducts. Therefore, it resists moisture and does not allow creatures such as bacteria and mites. Natural linen fabric provides a four-season refreshing and happy sleep. Viol Comfort layer gives a massage effect in your sleep.

SLEEPING SPACE

A sleep making stars jealous...

Standing out with its Weightless Relaxation spring technology developed by Leggett & Platt specifically for İDAŞ, Sleeping Space provides an extra support that persons with high body mass index need. While top layer of double-row spring system provides a comfortable and unique sleeping experience, bottom layer balances bed surface when pressure increases. It gives an excellent comfort and support for all laying positions. Thanks to its Active Support® feature, it helps you start the day more energetically. In addition, Doucinelle fabric with velvet-like touch makes you feel comfort at any time with soft texture. Preventing formation of bacteria and mites, Salteks Chemical Free fiber stuff is for those who do not compromise...

MEMORY SMART

Space technology to crown your sleep...

Developed to minimize “G” pressure that astronauts are exposed in shuttle and also known as memory foam, visco technology meets the pressure applied on sleeping surface. Since it minimizes pressure on weight points, takes the body shape and fills the cavities perfectly; it helps relieve muscle pain and stiffness. It also supports blood circulation. Therefore, person needs less to change position while sleeping and starts the day refreshed. With Special-Cut 5-Zone Comfort Layer, it balances weight areas of body and creates an uninterrupted comfort area. Air ducts in its structure are activated with movements and enables your bed to make air circulation. With moisture transfer method through air ducts, it provides climatic comfort.

Now stress is a dream, comfort is a reality...

Get ready for a sleep, which is cool and refreshing in summer and warming in winter. Developed by Leggett & Platt with Mira-Coil continuous spring system, Millennium bed is developed specifically for your health. Woolmark Blend® wool layer on the Winter side and cotton surface on the Summer side bring you comfort and happiness in any season..

With Intense fabric technology developed by Bekaert Deslee specifically for İDAŞ, complex carbon yarns keep static electric accumulated on your body during the day away. Therefore, every day of yours ends with peace.

COLLAGEN 30 PLUS

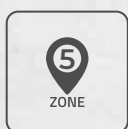

Skin-rejuvenating sleep experience

Offering a five-zone weight balancing pocket spring system, Collagen 30 Plus mattress selectively applies different support to the points of weight within your body with its spring system that works independently of each other and offers an uninterrupted comfort while sleeping, since it does not make you feel your partner's turning movements. While its special knitted fabric containing collagen helps protect skin health, it provides maximum sleep efficiency especially for users in their thirties and above by supporting the alleviation of joint pain and reduction of bone loss.

SMARTTECH ENERGY

The formula for energetic waking up

Thanks to the patented Smart Spring two-phase pocket spring technology, which is designed exclusively for İDAŞ, Smarttech Energy Plus mattress offers a soft welcome and comfort first and then a firmer and more solid sleeping surface for optimum spine support, regardless of body weight. Thanks to the smart spring system that optimally supports the spine in all sleeping positions and the specially formulated knitted fabric structure that supports deep rest, it helps to improve the mental and physical fatigue of young and particularly sportive users.

COOPER

Reduces sweating, accelerates sleep support

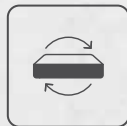

It provides comfortable and healthy spine support with the Bonnell Spring Frame system specially designed for İDAŞ.

Thanks to the natural properties of the copper element contained in the special knit fabric designed with COOPER technology, it helps distribute body heat to the mattress surface, thereby reducing sweating, while its anti-static effect helps reduce the time it takes to fall asleep. Thus, it creates a more comfortable and healthy sleep environment.

NATURA FLEX

Double-sided ergonomic comfort

The Latexit comfort layer used on the sleep surface with a springless support layer wraps the body perfectly and provides instant adaptation to body movements thanks to its high elasticity, offering a unique sleep experience with medium softness by reducing pressure points. On the other sleep surface, the high-density HR Flex medium-firm layer supports spinal alignment; by reducing pressure in the back and lumbar region, it supports body ergonomics and offers ideal sleep comfort every night thanks to its supportive structure and high durability.
